Reasons for Allowance

The independent claims recite radio receiving apparatus which calculates weights to estimate the directions of received signals and a limitation for the following:

"the second calculator calculates the weighting factors  $Wr_k$  from the equation  $Wr_k = Sk / (\text{sum } SkW_k)$ "

The prior art of record teaches radio receiving apparatus which calculates weights to estimate the directions of received signals using different equations than that recited in the limitation. New search updates revealed no other prior art which teaches the equation in the context of the claims. Therefore, Claims 1-8 and 10 are indicated allowable.
